

How to design your own buttons with Canva

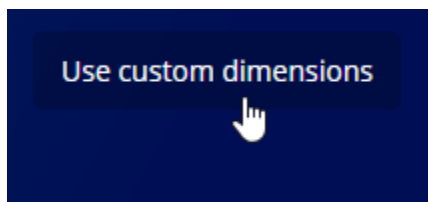

Go to <https://www.canva.com/>

Sign up for a free account.

The image shows a screenshot of the Canva sign-up form. At the top is the Canva logo. Below it, the text reads "New to Canva? Sign up!". The form consists of several input fields: "Full Name" (with a red prompt "What's your name?"), "Email", "Confirm Email", and "Password". Below these fields is a reCAPTCHA section with a checkbox labeled "I'm not a robot" and the reCAPTCHA logo. A green "Sign up" button is positioned below the reCAPTCHA. At the bottom, there is a disclaimer: "By signing up, you agree to Canva's [Terms of Use](#) and [Privacy Policy](#)."

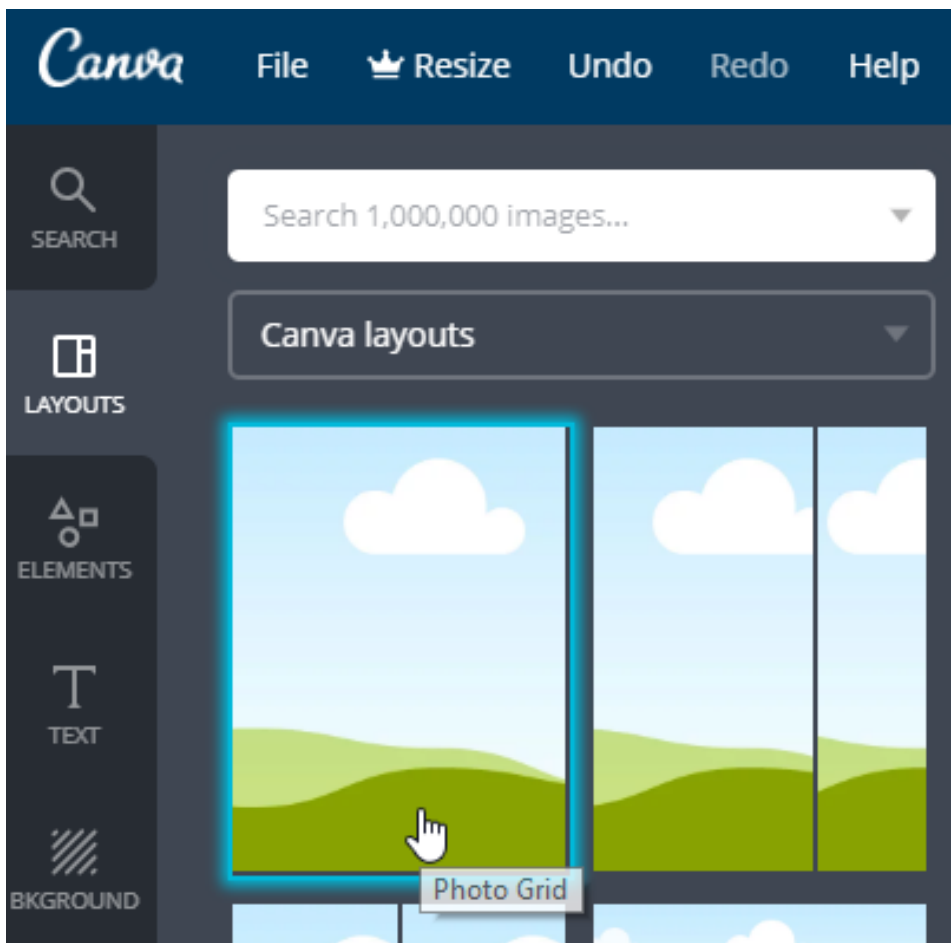

We'll be printing this on letter-sized paper so select 'custom dimensions' in the top right corner.

Select "in" and enter 8.5 as the width and 11 as the height. Then click on "Design!"

Click on Layouts and select the first one. This will fill the whole page.

Now go to the library website's Makerspace page:

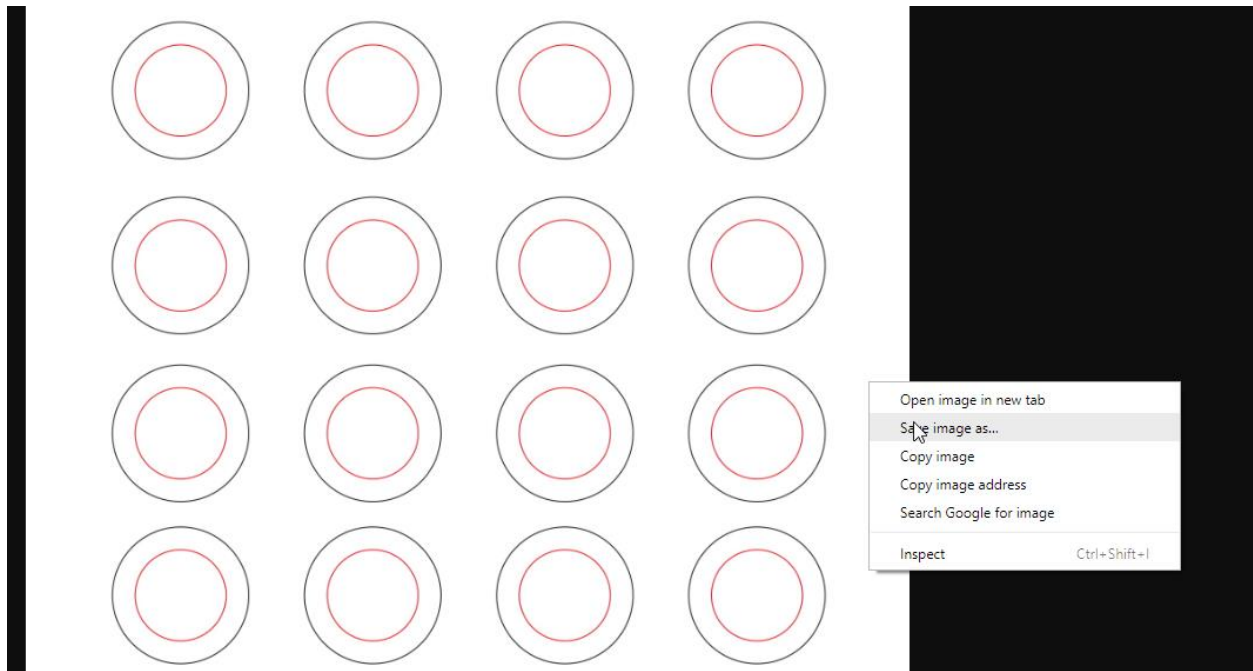

<https://fspl.ca/services/makerspace/>

Click on button maker. Click on the template for the 1" or 2 1/4" template.

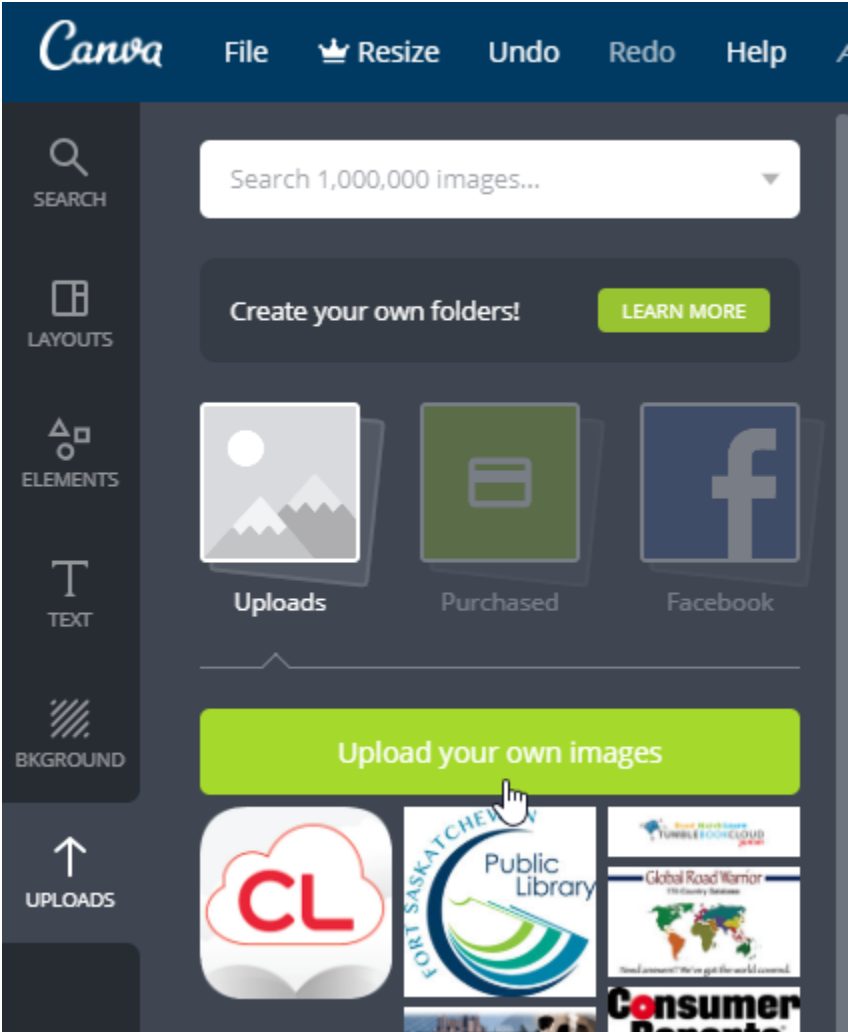

Button Maker

Try out our button maker! You can draw your own designs or you can create designs on the computer. We recommend the free online program, **Canva**. You can access 1" button template [here](#) and the 2 1/4" button template [here](#).

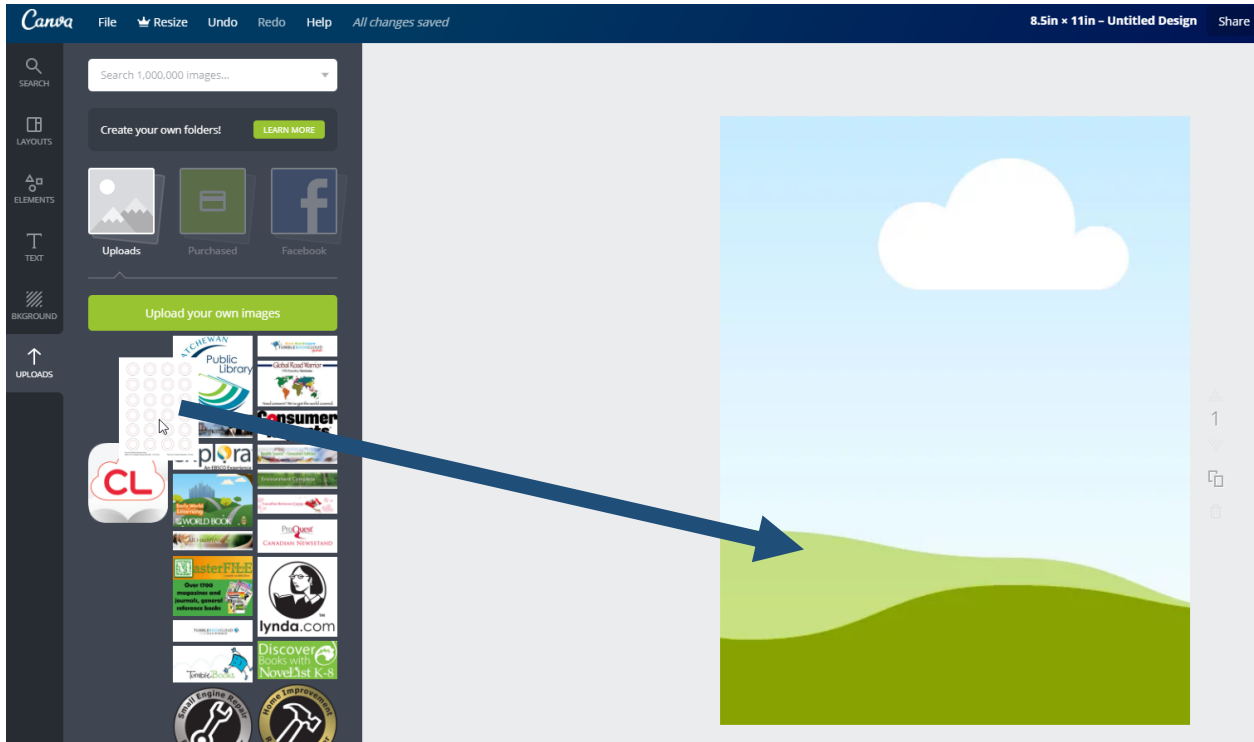

Right click on this image and save it to the computer.

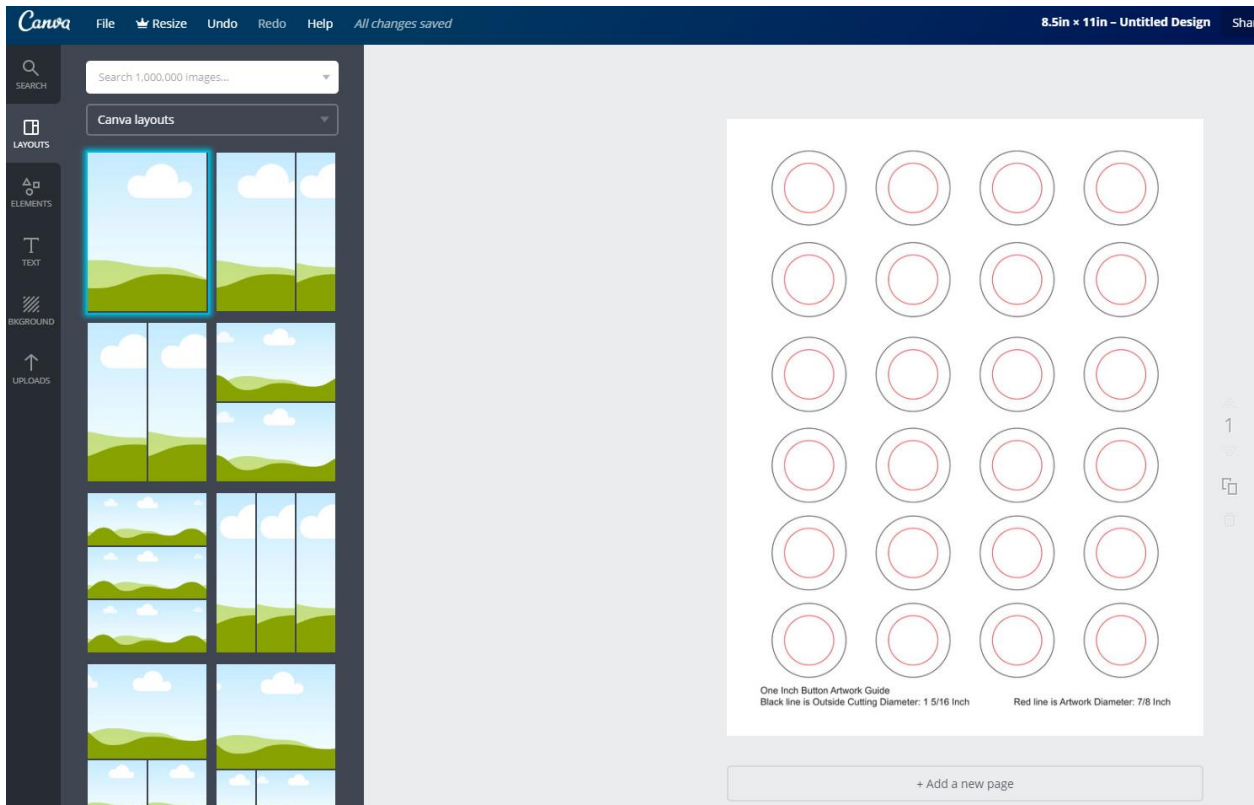

Now back in Canva, click on “Uploads” and “Upload your own images” and select the template that you just downloaded.

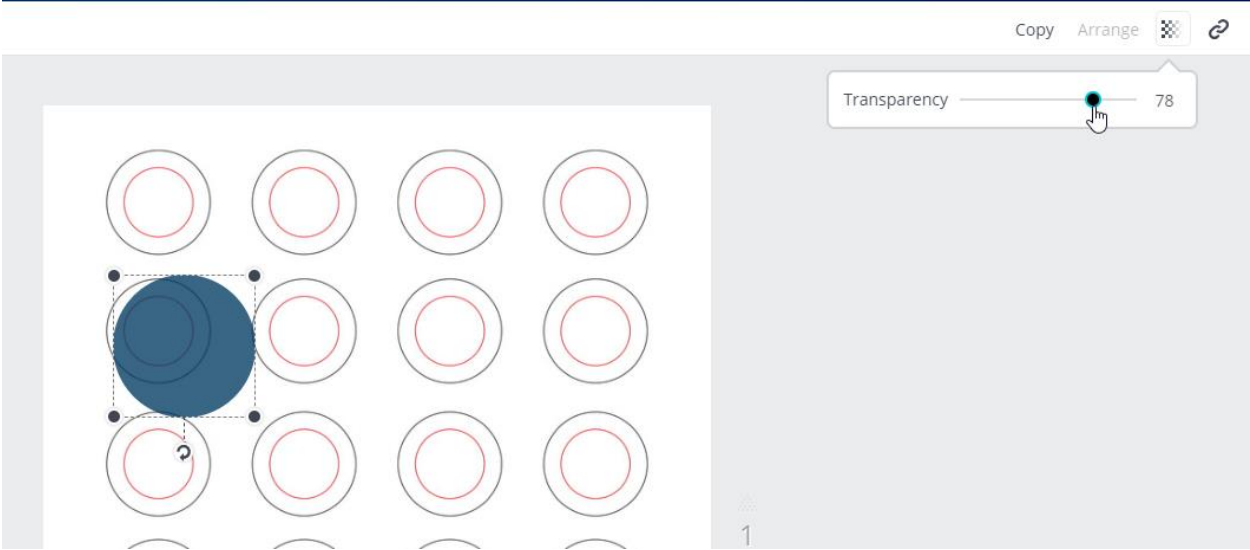

Click and drag the template over top of the layout.

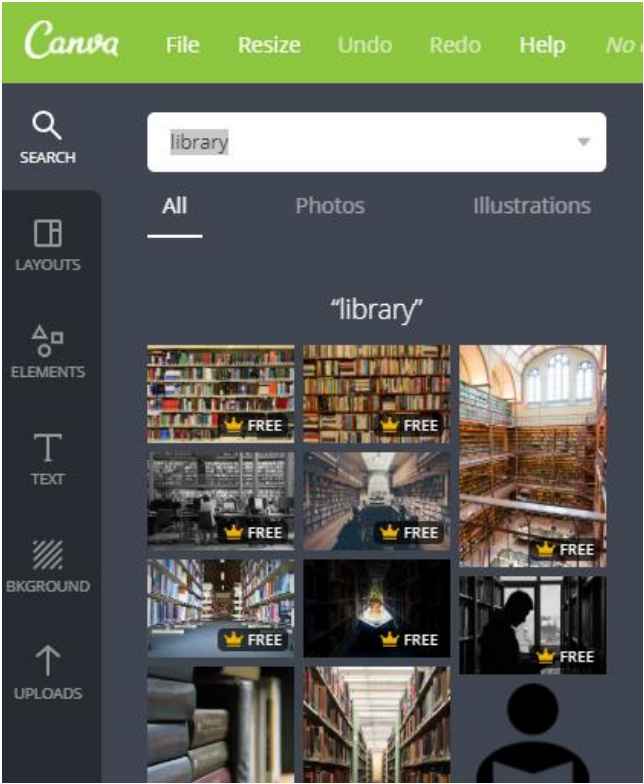

It will now look like this:

Now you are ready to design! Anything outside the red circle will likely get cut off when the button is punched out. You can adjust the transparency to check if your design is in the red circle and fitting in the template.

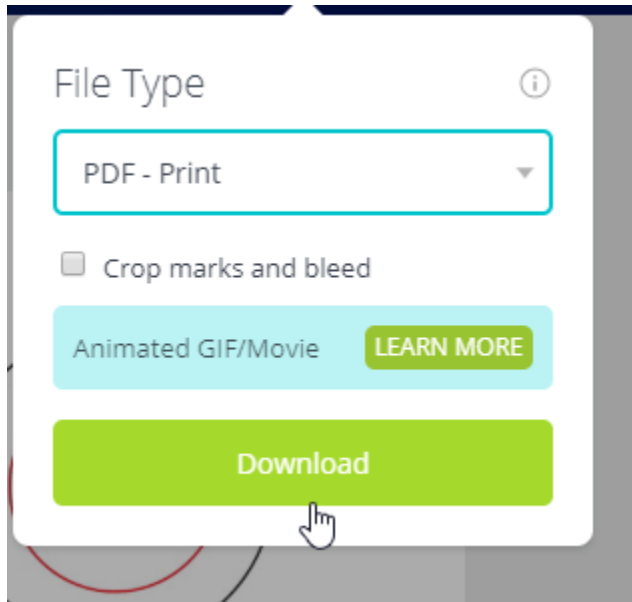

Canva has lots of free images, shapes, and designs. Some are free and some you can pay for. You can upload your own images as well. Use the search bar to browse different photos and illustrations.

When you're done click on Download.

Select PDF – Print

Open the download and print!
