FSPL Green Screen Information

Welcome to the Green Screen Setup at the Fort Saskatchewan Public Library! Follow these simple steps to create your video.

Step 1: Getting Started

You have two options to begin:

1. Borrow Equipment from the Front Desk:
   - Ask for the tripod and green screen iPad.
2. Use Your Own Device:
   - Apple Devices: Download **iMovie** from the App Store.
   - Android Devices: Download **CapCut** from the Google Play Store.

Step 2: Choose Your Background

1. Download Background:
   - Use the iPad or your device to download the video or picture you want as your background from the internet.
     i. Copyright free background options can be found on Unsplash, Pixabay, Pexels, or on any other stock photo website.
2. Select Preloaded Background:
   - You can also choose from the available background options already loaded on the FSPL iPad. These can be found in Photos.

Step 3: Record Your Green Screen Clips

1. Position the iPad/your device:
   - Place the iPad/your device in the tripod and adjust it to capture your video in front of the green screen.
2. Record Your Video:
   - Take the videos you need, making sure to stand clearly in front of the green screen.

Step 4: Edit Your Videos Together

For Apple Devices (Using iMovie)

1. Start A New Project:
   - Open iMovie and select "Movie" from the home screen.

2. Add Your Background:
    - Choose your background video or picture and press "Create Movie."
3. Add the Green-Screen Clip:
    - Scroll to the start of your background.
    - Tap the Add Media button (+) in the top right corner and select your green-screen video.
    - Tap the More button (…) and select Green/Blue Screen.
4. Fine-Tune Adjustments:
    - Strength: Tap Adjust and move the Strength slider.
    - Crop: Tap Mask and drag the corners to adjust.

For Android Devices (Using CapCut)

1. Upload Background Clips:
    - Open CapCut and start a New Project.
    - Add your background picture or video(s) and tap Add.
2. Add Green Screen Video:
    - Tap Overlay at the bottom.
    - Select Add overlay and choose your green screen video.
    - Pinch the video with your fingers to resize it so it fits the background properly.
3. Remove Green Screen Color:
    - Tap the green screen video.
    - Tap Remove BG.
    - Press Chroma Key and select the green color to remove.
4. Adjust the Effect:
    - Use the Intensity slider to adjust how much of the green is removed.
    - Adjust Shadow if needed to match the lighting.
5. Export Your Video:
    - Tap the check mark to apply changes.
    - Export your video as usual.

Step 5: Delete Files (for Library iPad Users)

After you're done:

1. **Delete Your Files:**
    - Go to both the Photos and iMovie app on the iPad.
    - Delete all of your videos, images, and project files to keep the device ready for the next user.

Need Help?

If you have any questions or need further assistance, please come to the front desk. We're here to help!

Happy filming!
